

Console Shade Clip Replacement

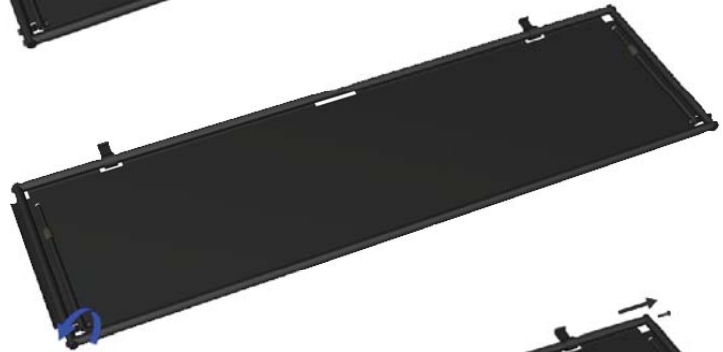

Tools Required:

#2 or #3 Phillips Screwdriver
Red Loctite (optional)

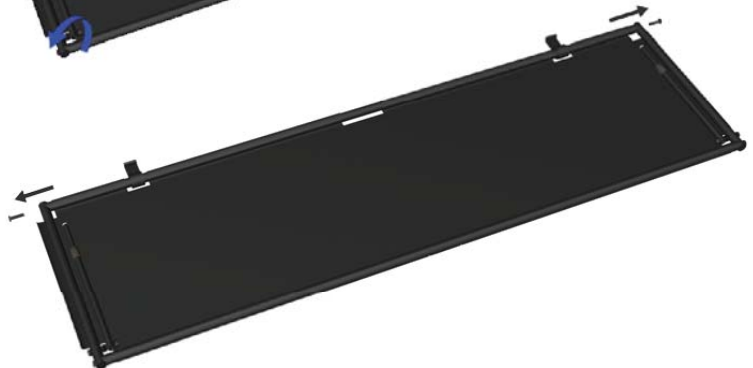

1. Place shade on flat surface with the bottom side up

2. Un-Velcro side tube and front tab

3. Remove the two (2) screws that hold the side tubes to the back tube that's containing the clips

4. Slide the long back tube out of the tube pocket, remove the old clips and replace with the new clips

5. Slide back rail back in pocket, replace screws -use red loctite on screw threads (optional)
